DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Mashinsky (U.S. Patent No. 6,226,365 B1).

Mashinsky discloses a telecommunication providing system and method.

The system comprises a server having access to a memory containing a set of responses to purchase request for telecommunication services (col. 9, lines 22-33); and a client (col. 22, lines 45-47), connected to the server (col. 22, lines 32-35), for inputting a purchase request (col. 11, lines 31-55), accessing the stored set of responses (col. 22, lines 48-67),

Art Unit: 3625

and providing an acceptance to the responses (col. 23, lines 7-14).

The method is disclosed for distributing telecommunication services (col. 2, lines 32-45).

Response to Arguments

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Johnson et al. (U.S. Patent No. 5,917,897) discloses a system and method for controlling a telecommunication network.

Thomas et al. (U.S. Patent No. 6,205,211 B1) discloses an internet telephony call pricing center.

Mashinsky (U.S. Patent No. 6,144,727) discloses a system similar to that discussed above.
